EDUCATION

KL University, Vaddeswaram

Expected Graduation: Jun 2028

B.Tech in Computer Science Engineering (AI/ML)

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Operating Systems, Machine Learning Fundamentals

Army Public School, Ranchi — High School Diploma

2008 – 2023

ACHIEVEMENTS

- **Patent Published** — “SoundWave – Gesture-to-Speech Assistive Gloves”; awarded a Certificate of Appreciation by KL University for innovation and research contribution.
- **Winner, Monitoring & Logging Jam** — SAMYAK Techno Management Fest 2025, KL University (selected from 100+ teams)
- **CodeChef 3-Star Programmer** — competitive programming, algorithmic problem solving
- **HackerRank 5-Star Problem Solving Badge** — data structures & algorithms proficiency

TECHNICAL SKILLS

- **Languages:** Java (Proficient), C (Good), SQL (Good), C++ (Moderate), Python (Familiar), JavaScript (ES6+), HTML5/CSS3
- **Frameworks & Libraries:** Spring Boot, React.js, Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, Postman, VS Code, Tinkercad
- **Core CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS (indexing, normalization, transactions), Computer Networks, Operating Systems
- **Cloud & Embedded Systems:** AWS (EC2, S3), Arduino IDE, ESP32, MATLAB/Simulink

EXPERIENCE

Full-Stack Development Intern — BeeSkilled

May 2026 – Jun 2026

6-Week MERN Stack Internship (MongoDB, Express.js, React.js, Node.js)

- Engineered a full-stack e-commerce web application with product listing, user authentication, cart, and order management.
- Built an admin dashboard for product and order control, applying RESTful API design and secure authentication flows.
- Strengthened Git-based version control, debugging, and code-review practices across a 6-week full-stack engineering sprint.

PROJECTS

Student Achievement Platform

Java · Spring Boot · MySQL · React (Vite) · REST APIs · JWT

Live: <https://fsad-frontend-gekj.onrender.com/>

- Replaced error-prone, paper-based tracking of extracurricular records and awards with a centralized full-stack platform for 100+ students across role-based admin/student dashboards.
- Engineered a JWT-authenticated REST API in Spring Boot with normalized MySQL schemas, enforcing secure, granular access control between admin and student roles.
- Built a responsive React SPA with dynamic, real-time data rendering, eliminating manual record-keeping overhead entirely.

SoundWave — Gesture-to-Speech Assistive Gloves

C++ · ESP32 · Flex Sensors · BLE · Tinkercad

- Designed an assistive wearable solving real-time communication for mute individuals, classifying 10+ distinct hand gestures via flex sensors interfaced with an ESP32 microcontroller.
- Implemented low-latency BLE wireless transmission to convert classified gestures into real-time text/speech output, applying embedded systems design to an accessibility problem.

NFCUnlock — Smart Vehicle Access Control System

C++ · Arduino IDE · NFC/RFID · Tinkercad

- Engineered an NFC/RFID-based access-control system that authorizes entry only for pre-registered tags, reducing unauthorized access vectors.
- Simulated and validated full circuit logic in Tinkercad prior to hardware deployment, eliminating rework before physical build.

OCMS — Online Course Management System

React.js · HTML5 · CSS3 · JavaScript

- Built a multi-role LMS frontend solving course discovery and progress tracking, enabling educators to publish/manage courses and students to enroll, stream content, and track progress in real time.
- Designed a reusable React component library with responsive layouts, ensuring consistent UX and faster feature iteration across desktop and mobile.

Defence Arsenal

HTML · CSS · JavaScript · GeoJSON

- Built a 7-module military intelligence platform centered on a GeoJSON-powered interactive world map, enabling users to explore country profiles and strategic installations geographically.
- Implemented search/filter and data-visualization tools — including military strength leaderboards and a comparison center — for real-time analysis of global defence capabilities.

CERTIFICATIONS

- Google AI Essentials — Google
- Implementing a Responsible Generative AI Solution in Microsoft Foundry — Microsoft
- Getting Started with Cisco Packet Tracer — Cisco Networking Academy
- Java Spring Boot — EDUCBA
